This Book is brought to you for free and open access by the Scholarly Commons @ Baystate: Images & Archives at Scholarly Commons @ Baystate Health. It has been accepted for inclusion in Library Newsletters by an authorized administrator of Scholarly Commons @ Baystate Health.

Message from the Director:

Secure printing is here! Calling all library users, to "LOOK before you print," heralding the long-awaited arrival of secure printing. As the easy steps below describe, secure printing was launched recently to enable all Baystate Health Sciences Library users to send their printing to one of the library's three copier/printers, and retrieve their print job securely. The Library takes HIPAA regulations very seriously and complies with all requirements of the law to ensure that clinical information in the Health Sciences Library is kept secure and confidential. Copier/printers release print jobs only to the person printing it – thus keeping patient information and for that matter all printing completely private. The Library adheres to many other ethical and regulatory aspects of information management, such as copyright and fair use requirements as well as site licensing of digital resources. Contact the Library for more information.

Ellen Brassil MSLS, MAT, AHIP, Director, Health Sciences Library

Improved SelectedWorks/Researcher Integration is on its way!

Your [Researcher Page](#) is closely integrated with Baystate's Publication Repository, [Scholarly Commons](#), with the ability to:

- Create a Web accessible archive that preserves your Baystate scholarship
- Build an online CV and make your research highly visible
- Link your profile to all abstracts and the full text of any open access publications
- Showcase research programs and presentations to outsiders who may be interested in your work

New multimedia display options and functionality are being implemented to the upgraded Selected Works (Researcher Profiles). SW will support streaming media, datasets, images, video, teaching materials, presentations, books, and much more.

Ask Baystate Health Sciences Librarians about ClinicalTrials.gov

Health Sciences librarians at Baystate recently completed an online course on clinical trials, sponsored by the National Network of Libraries of Medicine. The course covers the history and background of clinical trials, the evolution and expansion of the ClinicalTrials.gov database, developed in 2000 by the National Institutes of Health/National Library of Medicine. Originally a registry, ClinicalTrials.gov now provides reporting and other information such as eligibility criteria. Just a few years ago ClinicalTrials.gov began allowing sponsors and principal investigators to submit the results of clinical studies and required the submission of adverse event information. NIH policy ensures that every clinical trial that receives NIH funding is registered on ClinicalTrials.gov and has summary results submitted and posted after a trial's primary completion for public access in a timely manner. An invaluable resource for researchers, the general public and others, ClinicalTrials.gov demonstrates ways to search and interpret studies with search results. Contact the Baystate Health Sciences Librarians for more information and assistance.

New eBooks added to the Library's Online Collection

Check out some of the new eBooks added to our online collection:

- [2015-2017 ASPAN Standard - Perianesthesia Nursing Standards, Practice Recommendations and Interpretive Statements](#) (StatRef)
- [Nelsons Antimicrobial Pediatric Therapy](#) (R2digital Library)
- [Medical-Surgical Nursing Care](#) – (StatRef)

Baystate School of Nursing History Archive

The Springfield Hospital/ Baystate School of Nursing opened its training school on May 18, 1892. In 1894, six students received their diplomas during the school's first commencement ceremony. A tradition of excellence had begun that would span over 107 years. Images of the former School of Nursing have been preserved in print and are now being uploaded to the Library's repository, [Scholarly Commons](#).
